

On page 5, after line 7, insert:

Various modifications and alterations to the invention may be appreciated based on a review of this disclosure. These changes and additions are intended to be within the scope and spirit of the invention as defined by the following claims.

IN THE CLAIMS

On page 6, line 1, replace "CLAIMS" with - - **WHAT IS CLAIMED IS:** - -.

Please amend claims 1-8, as follows:

1. (Once Amended) A door or window comprising a frame for supporting at least one glass panel and [, applied to one face of said panel,] a layer for filtering [the] light [radiations] radiating therethrough, a seating extending along [said] the frame, in a position corresponding to the periphery of [said] the panel, and a tubular light source [accommodated in said] accommodated by [seating] or [a light source] distributed along [said] the seating.

2. (Once Amended) [A] The door or window set forth in [accordance with] claim 1, wherein [said] the seating [consists of] has a generally C-shaped section inserted in [said] the frame.

3. (Once Amended) [A] The door or window set forth in [accordance with] claim 2, wherein [said] the C-shaped section is interposed between [said] the glass panel and a finishing frame affixed [along said] to the frame [and capable of hiding] so as to hide [said] the section from view.

4. (Once Amended) [A lighting fixture] The door or window set forth in [accordance with] claim 1, wherein [said] the frame [consists of] has a metal section [provided] with a first grooved and generally continuous seating [to engage with the edges of said] for engaging the panel edges and a second, generally parallel, grooved seating [to accommodate] for accommodating [said] the light source.

5. (Once Amended) [A lighting fixture] The door or window set forth in [accordance with] claim 4, wherein [said] the metal section [is provided with] has an intermediate groove between [said] the first grooved seating and [said] the second grooved seating [to slidably accommodate the] for slidably receiving edges of a movable, [reflecting] reflective curtain.

6. (Once Amended) A [metal section for realizing the] frame of [the] a glazed door or window [according to any of the previous claims, characterized in that it has], the frame having a metal section with [two] a plurality of generally parallel, grooved and continuous seatings [that extend] extending along [one of its sides] a side thereof, [the] a first of [said] the seatings being provided [to engage with the] for engaging an edge of a glass panel[, the] and a second of [said] the seatings being
